Doctor Kronhaus and Dr. Taavoni:

Today I received condolences from Dr. Perry on the death of my father and her patient, Norman Burke. He was a resident at Carolina House, now called Brookdale Meadowmont, in Chapel Hill. Her kind expression on behalf of herself and your service was greatly appreciated.

I want to take this opportunity to express my thanks and praise for her care and case management of Mr. Burke. My sister and I regularly encountered misunderstandings and miscommunication with the medical technicians and more specifically their supervisor at Brookdale Senior Living with regard to his medications and their administration as well as his physical treatment and care. I could always rely upon Dr. Perry to update me after her visits; follow up on my questions and concerns; and make me a part of her final prescription for his needs. She always returned my calls and answered my messages.

Without her first-hand knowledge and openness of expression, I could not have made the informed decisions I did with respect to his care. She is indeed a patient/family oriented physician and care-taker; a must for an aging father and his daughters. Please express our gratitude to her.

Thank you again.
