

I'm writing to express my appreciation for the services "Doctors Making House Calls" provides. My 90-year-old mother is chronically ill, and doesn't have the strength to visit a doctor. She wants very much to remain in her home as long as she can. We are so thankful to Dr. Nanjagowder who visits almost weekly and more if she suffers health problems. His patience and understanding is as valued as his prognoses and prescriptions for her ailments. He has prolonged her life, and made it more pain free, and we are very grateful. I hope I can be of value to you as a testimonial to the outstanding work you're doing for the community.
