

Dear Jeff,

Thanks is inadequate to express our gratitude for the care you took in treating Dad all of these years. I can say that without doubt, you were instrumental in Dad reaching the age of 103.

You brought not only a breath of experience to the job, but also a significant measure of attention to every detail of Dad's mental and physical condition. I always knew that Dad was not just another slot on your schedule. You were as familiar with him as a patient that you always put that day's examination in the context of medical history.

Thank you so much, Jeff.

Dad died peacefully yesterday. His heart and lungs were strong until the end, but the combination of a fungal and hospital borne bacterial infection overwhelmed his kidneys.

Dad always appreciated the care you gave him.

I'll never forget how good you were to him.

Sincerely,

Mary E.
