

I am just sending you a quick letter to tell you that I am super impressed with Kimberly Tenold, PA. My Mom, Betty is in [a facility in Charlotte] and had pneumonia/bronchitis and at 88 years old, it has been quite a struggle. My Mom has been so sick and Kimberly has certainly helped to get my Mom back on track.

Kimberly has come in and looked at my Mom several times and has really helped the situation with the prescriptions and advice on daily regimen of meds/exercise for lungs.

She's the best PA ever and I certainly do appreciate her bedside manner, which is excellent, and also her demeanor with the elderly, and understanding what obstacles elderly face.

Anyhow, I just wanted you to know b/c I give her kudos for getting my Mom better.

**Sincerely,
Beth R.**
